TIMEDO LABS

All things wireless

High quality consulting, implementation and R&D services in the field of modern wireless systems (5G, 6G, IoT, O-RAN).

RIMEDO LABS

rimedolabs.com

Who we are?

RIMEDO Labs specializes in providing the best quality and substantive consulting, implementation and R&D services in the field of modern wireless systems.

We implement this through an individual and open approach to the client, constantly improving the team operationally and substantively, updating knowledge and a unique combination of science and business applications.

RIMEDO Labs is a spin-off from the Poznan University of Technology, Poland from the Institute of Radiocommunications.

RIMEDO LABS

Why we?

Work experience for equipment manufacturers, operators, national and international projects

Experienced scientific and research staff

Knowledge sharing

TIMEDO LABS

Close cooperation with the Poznan University of Technology (University spin-off)

Experts in the field - most of the staff have a minimum doctorate degree specializing in radiocommunication

Combining university and business knowledge

A non-standard and modern approach to the topic

Access to specialized measuring and research tools

Applied Research

The areas of our specialization cover wireless systems (like LTE, 5G, 6G, IoT, Wi-Fi), spectrum sharing and management, radio resource management, AI for wireless systems and private mobile networks. We offer our expertise as part of consortiums for EU and National funded projects (like Horizon 2020, Horizon Europe, NCBR, etc.). We can take part in those projects as leader, partner or subcontractor.

Consulting

Having extensive experience in the field of modern wireless systems we offer high quality consulting and advisory services delivered by our seasoned engineers and consultants. RIMEDO Labs Consulting include cover, among others the following items: radio planning and site surveys, technology forecasting, preparation of feasibility studies, systems architecting, wireless systems patent analysis, standards tracking, or expert/R&D team outsourcing.

Training

Our training services include online and on-site courses, conferences, meetups or workshops tailored to customer's needs and requirements. The topics, which are covered by us include: 4G, 5G and beyond, IoT, Wi-Fi, spectrum management, radio resource management, private networks, design, planning and troubleshooting of wireless systems, artificial intelligence for wireless systems. Our top-class instructors combine scientific and educational background with practical experience. We speak about the systems we design.

Technical Content Delivery

We provide technical contents for external training or consultancy companies delivered as training materials, technical documents, dedicated research papers, books, book chapters, slides, reports or raw materials for further processing. The material can be developed as insights onto a specific feature or aspect within wireless systems area, including topics like: LTE, 5G and beyond, Wi-Fi, IoT, shared spectrum, AI, etc. The educational content, can be also delivered in the form of virtual radio labs.

Our values

Reliability: the Team and the Customer can rely on us.

Openness & Transparency: inside and outside of the company.

Strive for Excellence: in processes, technology and serving the Customer.

Team First: motivated team – satisfied customer.

Knowledge Sharing: inside and outside of the company.

TIMEDO LABS

How we work?

Requirements gathering and analysis

Discussion with the customer to obtain all required information and analysis of the requirements.

Offer preparation and service delivery

Providing alternatives or best single offer according to requirements. The customer is assigned a dedicated consultant to lead the assignment.

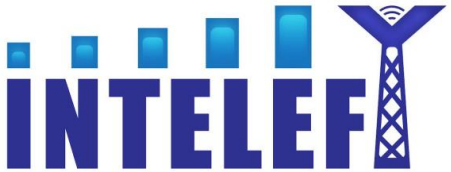
Feedback and post service support

We include offline Q&A in a certain period after the main service is delivered, to make sure that the customer is not left with unanswered questions.

Commercial projects our team members took part in

- R&D Consulting: Designing RRM / SON algorithms for LTE & 5G systems, architecture design for 5G RAN, and research on Radio Environment Maps (REM) for 5G for the Tier 1 telecom vendor.
- 5G Training: Conducting and designing LTE/5G technical courses including preparation of the course concept, materials, scripts, exercises, and knowledge transfer for online and on-site courses.
- 5G Standardization in LAA: Consulting on specific aspects of LTE and 5G standardization progress in Wi-Fi / LAA involving detailed research and training for the customer.
- 5G Standardization in V2X: Consulting on NR-V2X and C-V2X PHY layer to provide guidance for implementation based on 3GPP normative documents.
- 5G Consultations: Answering investment institutions' questions like: What 5G is? What are the key players? What are the main features? When will it be implemented? What are the challenges for 5G? What is O-RAN?
- 5G Patent Analysis: Analysis of the significance of the 5G patents, preparation of claim charts, comparing various versions of the patent.
- 5G Simulation Implementation: Software development services in the area of spectrum sharing, CBRS and alike including database implementation, conducting simulation campaings and algorithm development.

Our partners & customers



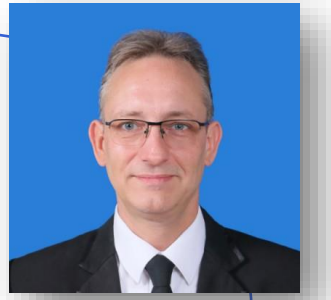
What customers say about us

"I worked with Marcin and his group through CAsE Analysis and we couldn't have been more impressed. Marcin communicates clearly, is timely with his work and responses, and is technically top notch. He and his team's knowledge and experience in 4G and 5G is unparalleled. It was a pleasure working with him his team and I look forward to the next project."

Charles Eldering, CEO, CAsE Analysis

"We've been collaborating with Rimedo Labs on communication networks standardization analysis. The firm's experts proved to be knowledgeable, thorough, and swift in their analysis. Since our engagement has been successful, we're planning on continuing our collaboration."

Amos Freund, VP R&D, Autotalks LTD



„Excellent System Training for anyone who wants to learn more about the nuts and bolts of Open RAN. Covers in depth the Open RAN architecture based on O-RAN Alliance specifications and 3GPP including E2 nodes, RAN Intelligent Controller, SMO, all interfaces, the importance of automation, detailed use case analysis and so much more. Comes with several bonuses incl. a 90min chapter on Open RAN specific network slicing. Thanks to Rimedo Labs for creating this course!"

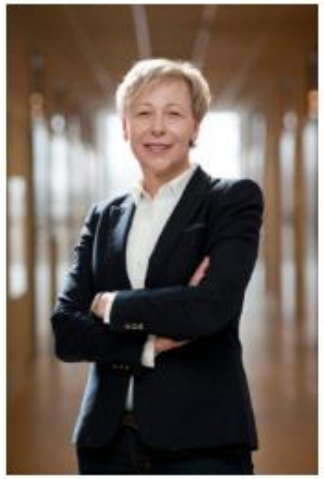
Stefan Kreyssig, Network Solution Architect, Atos

Founders

Marcin Dryjański, Ph.D.

Principal Consultant / CEO

Involved in 5G design since 2012.
Senior IEEE Member.



Prof. Hanna Bogucka

Head of Cooperation / Board Member

Professor of technical sciences.
Senior IEEE Member.

Adrian Kliks, Ph.D.

Chief Architect / Board Member

International projects manager.
Senior IEEE Member.

Paweł Kryszkiewicz, Ph.D.

Technical Director

Cognitive Radio systems expert.
Senior IEEE Member.

"A Unified Traffic Steering Framework For LTE Radio Access Network Coordination", **Marcin Dryjański,** Michał Szydełko, Jul 2016, IEEE Communications Magazine

EU Projects our team members took part in

COHERENT – Coordinated control and spectrum management for 5G heterogeneous radio access networks – EU H2020

5GNOW – 5th Generation Non-Orthogonal Waveforms for Asynchronous Signalling – EU FP7

SOLDER – Spectrum OverLay through aggregation of heterogeneous DispERsed Bands – EU FP7

NEWCOM# – Network of Excellence in Wireless Communication – EU FP7

ACROPOLIS – Advanced coexistence technologies for radio optimisation in licenced and unlicensed spectrum – EU FP7

COGEU – Cognitive radio systems for efficient sharing of TV white spaces in European context – EU FP7

NEWCOM++ – Network of Excellence in Wireless Communication – EU FP7

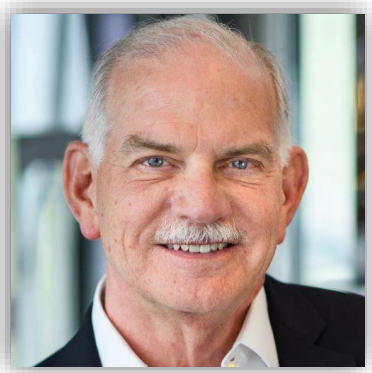
Our Advisory Board

Prof. Lajos Hanzo, Ph.D.

Professor at University of Southampton
UK

Prof. T. Russell Hsing

Advisory Council Member for Harvard Business Review, USA



Prof. H. Vincent Poor

Professor at Princeton University
USA

Russell Lundberg

Consultant & Senior Manager
USA

Youssouf Ould Chekih Mouhamedou, Ph.D.

Senior R&D Expert/Advisor at Saudi Telecom Company (STC), Saudi Arabia

Your trusted partner in: DSS, LTE, 5G, 6G, RRM, Private Mobile Networks, Wi-Fi, IoT, UDN, O-RAN.
